

BRIEFING INFORMATION ON 5 NEW GARBAGE TRUCKS

All of the garbage trucks were tendered in accordance with the Central Tender Committee (CTC) guidelines and procured by the Department of Vehicle and Equipment services (DVES) on behalf of the Ministry of Home Affairs, Health and Culture for the Department of Environmental Health.

These trucks are in addition to the new Al Jon Waste Compactor unit which is now operational at the George Town landfill. The 10 new trucks will consist of 3 residential rear loader trucks (2 here now and 1 left to be ship next week); 3 Front Loader Trucks (all 3 here) for commercial waste; 3 Roll On / Roll Off Trucks (due to ship by end of March) for commercial waste; and 1 Grapple Truck (due to arrive in two weeks) for residential and commercial waste. Funding for the ten (10) new garbage trucks came from last year's, 2014-15 budget.

We have received 5 of the 10 new garbage trucks that have been procured as outlined below:

SUPPLIER: MC NELIUS TRUCKING, USA

NOTES

- All garbage trucks are expected to be in service from this Friday, March 6, 2015 after completing necessary checks, licensing and staff training.
- IMMEDIATELY – All commercial customers with front loading containers will be on normal schedules.
- Residential Customers will consistently have their household waste collected earlier on their scheduled collection day.
- The public will also benefit as all of the residential and commercial garbage trucks should be off the road by 12:30 p.m.

Contact DEH for additional information as necessary at 949-6696.
